DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1, 4, 10 and 11 have been rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The limitation "said fixing section is further provided with a top section that is perpendicular to and attached at each edge to the fixing piece sections" is not supported by the original specification or drawings. The fixing section top section is a curved section that isn't perpendicular to the fixing piece sections.

Claim Objections

3. Claim 1 has been objected to because of the following informalities: line 10, "see" should be "seen". Appropriate correction is required.
